CAREER OBJECTIVE

MCA student with a solid understanding of programming fundamentals and data structures, and hands-on experience in building AI-based applications. Currently expanding skills in backend development and REST APIs. Seeking a role to apply problem-solving abilities, learn from real-world projects, and contribute to building reliable and scalable applications.

TECHNICAL SKILLS

Programming Languages: Python, Java

Web Technologies: HTML, JavaScript, React (basic), REST APIs

AI/ML: Machine Learning, Generative AI, Neural Networks

Tools: Git, GitHub, FastAPI, Streamlit, Postman

Databases: MongoDB, MySQL

PROJECTS

1. Nova – Intelligent Voice Assistant

- Built a voice-controlled AI assistant for natural language commands and contextual response.
- Integrated speech recognition and text-to-speech for real-time interaction.
- **Technologies:** Python, SpeechRecognition, pyttsx3, NLTK, OpenAI API, PyAudio.

2. AI-Based Placement Assistant Chatbot

- Developed a FastAPI-based chatbot to automate placement-related queries.
- Developed REST API endpoints for chatbot interaction, voice-based input, and secure file upload handling with PDF/TXT text extraction support.
- **Technologies:** Python, FastAPI, REST APIs, PyPDF2, SpeechRecognition, Requests, JSON, API Testing.

3. Sentiment Analysis on Amazon Product Reviews

- Built a ML model to classify Amazon reviews (positive/negative/neutral).
- Applied NLP preprocessing and evaluated model performance.
- **Technologies:** Python, NLP, NLTK, Scikit-learn, Pandas, NumPy.
